The Cruelty of Planned Parenthood Exposed—Again

**Planned Parenthood Crushes Babies to Death
But Preserves Body Parts for Sale**

U.S. Rep. Chris Smith (NJ-04)
Excerpts of Floor remarks
July 21, 2015

Mr. Speaker, in 2011, an undercover video-taped sting operation by Live Action exposed several Planned Parenthood affiliates who were eager, ready and willing to facilitate secret abortions for child sex trafficking victims—some as young or younger than 14—to get them on the streets again.

As the prime author of the Trafficking Victims Protection Act of 2000—the landmark law that seeks to protect victims, mostly women and children—I found the on-the-record willingness of Planned Parenthood personnel to exploit young girls and partner with sex traffickers to be absolutely appalling. Watch the video yourself on LiveAction.org.

In 2012, Live Action released another sting operation video—part of a new series, Gendercide: Sex Selection in America--showing Planned Parenthood staff advising an undercover female investigator how to procure a sex-selection abortion.

Caught on tape, Planned Parenthood tells the investigator to wait until the baby is 5 months along to get an ultrasound that will reveal the sex of the child.

Then, if it's a girl, kill it.

Planned Parenthood is ok with exterminating the girl child in its huge network of clinics simply because she's a girl. What a dangerous place for little girls.

Now we've learned that Planned Parenthood is trafficking in baby body parts and intact organs like livers and hearts charging up to \$100 or more per body part.

Not only has Planned Parenthood killed over 7 million innocent babies in their chain of abortion clinics, about 330,000 children per year, but now shocking new undercover videos by the Center for Medical Progress—part of a three year investigative journalism study—shows high ranking Planned Parenthood officials explaining how they market and profit from the sale of the organs of their victims. And how doctors maneuver abortion instruments to ensure intact organs.

In one clip, Dr. Deborah Nucatola, Senior Director of Planned Parenthood Federation of America's Medical Services—and an abortionist herself—explains 'we've been very good at getting heart, lung, liver, because we know that, so I'm not gonna crush that part, I'm gonna basically crush below, I'm gonna crush above, and I'm gonna see if I can get it all intact.'

Dr. Nucatola says on camera, 'I'd say a lot of people want liver. And for that reason, most providers will do this case under ultrasound guidance, so they'll know where they're putting their forceps.'

In other words, crush the baby to death but do it in a way that preserves certain organs and body parts for sale.

Dr. Nucatola even suggests on tape creating a 'menu.'

Today, another new devastating video was released by the Center for Medical Progress. It shows Planned Parenthood Federation of America's Medical Directors' Council President Dr. Mary Gatter offering to use a "less crunchy technique" to get more intact organs and baby body parts.

Less crunchy? Like Dr. Nucatola, Dr. Gatter is nonchalantly talking about crunching—crushing—babies to death in ways that are more likely to preserve body parts and intact organs.

In a conversation with an undercover, prospective baby parts buyer, Dr. Gatter points out that there is no cost to Planned Parenthood in procuring the organs. She says "it was logistically very easy for us, we didn't have to do anything. So there was compensation for this."

Over lunch, Dr. Gatter suggests, that \$100 per body part isn't enough and says "let me just figure out what others are getting, and if this is in the ballpark then its fine, if it's still low, then we can bump it up. I want a Lamborghini."

How does Planned Parenthood respond?

Caught red-handed dehumanizing babies and stealing their body parts, Planned Parenthood have launched personal attacks against Daniel Daleiden—the Center for Medical Progress Project Leader and Lila Rose, the president of Live Action.

Current law that proscribes altering abortion procedures in order to procure baby organs and body parts as well as the law that says it is 'unlawful for any person to knowingly acquire, receive or otherwise transfer any human fetal tissue for valuable consideration' need to be enforced and if need be, strengthened. The ban on partial-birth abortion and the Born Alive Infant Protection Act may have relevance here. As does the House-passed Pain Capable Unborn Child Protection Act.
