## **Rep. Lipinski Statement on 40th Anniversary of Roe vs. Wade**

"The 40th anniversary of Roe v. Wade is a sad occasion. In that time more than 53 million babies were denied the right to life. While we mourn for the babies and their mothers, we in the pro-life movement must rededicate ourselves to prayer and action to protect life. In Washington we must continue to focus on changing our nation's laws. But we all must also be committed to changing hearts and minds, along with caring for expectant mothers and their babies. These are not easy tasks. But every year as we sadly commemorate Roe v. Wade, I am uplifted by the March for Life, especially the participation of so many young people. With hard work and God's grace, we will move our nation away from the culture of death to embrace a culture of life."
